LIVE CLASS ROOM

Children are the heart of the social. They, by their liveliness, their innocent smiles, fill our life with joy and happiness. Moreover, they are the key to develop the world in the future as well as the soul of change our life in the better ways. Thus, our responsibility to the children is fostering not only their health but also their knowledge to grow their talent.

Teaching children has never ever been an easy job to do. At this age, our children aware of almost everything they see, and start to explore the world with their immature mind, filled with curiosity and enjoyment. This can be good, but this also can be bad if we don't know how to guide them to the good things.

In order to make learning more attractive to the children, this program was created. The initial, as well as the ultimate aim of the program is to enhance and develop child's creativity and give them a healthy way to explore the world outside.

Our product is a soft-ware that provides a live class through the network called TutorOnline. By using this product, the tutor can teach children without personal meeting. Furthermore, the child can play a funny and challenging math game with other children without facing. It brings the children the time to study and relax mixed with no boring.

The product use a computer connected to a touch-pane. The children and the teacher can write things such as the result, the operator or math problems on the touch-pane. The things that they wrote are showed on the computer screens of both child and his teacher so that the teacher can know the answer of the child.

Especially, the children can play our funny game contained in our product called sea-horse Math Game. The game was created in order to improve the ability to calculate with math operator. In that, there are many easy but limited time to think math problems and there are four answer following each problem. The children choose their own answer by the touch-pane. Each problem, the child who chooses the right answer can receive a correlative number of points. Moreover, the game is organized as the sea-horse Game that can make the children more interested in playing.

In conclusion, our product brings us another effective way of teaching children. With the friendly Graphics User Interface, good animation and attractive games, the children won't get the boring and stressful feeling of studying.
